CSI
Certificazione e Testing

Description: Thermal and acoustics materials. Are manufactured with temperature lamination of Aluminium foil with a white E-Glass, which is needle punched and quilted, thinner material with higher temperature insulation.

Application: Double layer materials, ideally suited for all applications where noise and heat temperature prevail, for examples Vehicle engine compartments, Agriculture machine, Motorcycles, Marine Industry, Commercial transport.

Finishing: Embossed Aluminium. Available on the application side with self adhesive.

Weight: gr 1.900 sqm

Thickness: 7 mm \pm 2 mm

Working Temperature: From -40°C up to +250°C

Fire resistance: Autoextinguable in according to ISO 3795; FMVSS302
Fire speed combustion: \leq 70 mm/min
